

**Duncan Machine Products, Inc.**

## **Supplier Flow Down Requirements**

The Supplier requirements below apply to all Suppliers and sub-tier Suppliers to Duncan Machine Products, Inc., hereinafter referred to as PURCHASER, providing raw materials, manufactured components and products as well as performing material processing such as, but not limited to: heat treating; chemical processing; surface enhancements; non-destructive and destructive testing; coatings; welding; and nonconventional machining processes for Aerospace products. Acceptance of a Purchase Order from the Purchaser binds the Supplier to the Terms and Conditions listed in the Purchase Order and the requirements listed in this document. The Supplier is not authorized to outsource any portion of the Purchase Order requirements unless specifically authorized by the Purchaser and must flow down these requirements to any sub-tier Suppliers. Note that these requirements correspond with the requirements of the Purchaser's customers and with the requirements of AS9100D, Clause 8.4.3.

**A. The processes, products, and services to be provided including the identification of relevant technical data (e.g., specifications, drawings, process requirements, work instructions)**

Refer to Purchaser's purchase order and / or the acknowledgement provided by Supplier.

**B. The approval of: products and services; methods, processes, and equipment; the release of products and services;**

Each shipment must be accompanied by one legible copy of a statement of conformance unless otherwise noted in the Purchase Order. A certificate of conformance (C of C), supplied with the shipment must provide at a minimum: Supplier name, part number, purchase order number, quantity of parts, engineering revision, serial numbers (if applicable), and title and name of authorized Supplier representative.

- Material certifications shall show quantitative analysis of each element and physical testing. Traceability for Raw Material is required and shall be retained and provided to the Purchaser with product.

**C. Competence, including any required qualification of persons;**

Supplier will ensure that employees and people working on its behalf are competent and trained in accordance with the requirements of AS9100D.

**D. The Supplier's interactions with the Purchaser;**

In addition to the other requirements recorded within this document, Suppliers shall hold all information received from the Purchaser in confidence and no third-party request for information will be authorized unless approved, in writing, by the Purchaser.

**E. Control and monitoring of Supplier's performance to be applied by the Purchaser;**

The Purchaser will score Suppliers based on Quality, Delivery, and Service. Suppliers that fail to perform in these areas may receive Corrective Actions and may be considered for probation or removal from the Purchaser's Approved Supplier List.

**F. Verification or validation activities that the Purchaser, or its customer, intends to perform at Supplier's premises;**

The Purchaser and its customers reserve the right to perform verification and/or validation activities at the Supplier's premises.

**G. Design and development control;**

Design and development control does not apply to the Purchaser's Suppliers, unless otherwise specified on our PO.

**H. Special requirements, critical items, or key characteristics;**

As per the requirements of AS9100D, Supplier is responsible for the validation, and periodic revalidation, of the ability to achieve planned results of the processes for production and service provision, where the resulting output cannot be verified by subsequent monitoring or measurement.

**I. Test, inspection, and verification (including production process verification);**

For calibration Purchase Orders, all gauges and instruments must be calibrated using standards whose accuracies are traceable to the National Institute of Standards and Technology, the General Conference of Weights and Measures. All provided calibration certifications must specifically state this traceability. Supplier will maintain a quality/inspection system that will ensure all goods and services conform to contract requirements whether manufactured or processed by Supplier or procured from Sub-Tier Suppliers.

**J. The use of statistical techniques for product acceptance and related instructions for acceptance by the Purchaser;**

The Supplier will use a C=0 sampling plan with an AQL of 2 or 100% inspection, unless otherwise specified or agreed upon in writing by the Purchaser.

**K. The need to:**

**– implement a quality management system**

When specifically requested by the Purchaser in writing, Supplier will maintain a quality system in compliance to recognized Quality Management Systems and/or approved by the Purchaser.

**– use customer-designated or approved external providers, including process sources (e.g., special processes);**

When required by the Purchaser or by the Purchaser's customers, Suppliers will use customer-specified sources.

**– notify the Purchaser of nonconforming processes, products, or services and obtain approval for their disposition;**

The Purchaser will not accept Supplier product that does not meet Purchase Order requirements. Supplier product discovered after shipment by the Supplier to be nonconforming shall be immediately disclosed to the Purchaser upon discovery, including but not limited to quantity shipped, date shipped, and the extent of the nonconformance. Suppliers that receive notification of Nonconforming product shall take appropriate action to contain the nonconforming condition and prevent it from occurring again. The Supplier will be notified if formal Corrective Action is required to be submitted to the Purchaser. The response shall be submitted within 1 week of issue or a time frame agreed upon between the Purchaser and the Supplier. Errors with paperwork shall be resolved within 24 hours.

**– prevent the use of counterfeit parts (see 8.1.4);**

To prevent the purchase of counterfeit or suspect / unapproved products and to ensure product identification and traceability (and for other reasons), Supplier will institute controls that include the requirement of Material

Certificates, Certificates of Conformity, and/or other supporting documentation as is appropriate. Material and part substitutions are not allowed.

**– notify the Purchaser of changes to processes, products, or services, including changes of their external providers or location of manufacture, and obtain the Purchaser’s approval;**

Supplier will notify the Purchaser of any change in ownership, management, or location and are subject to re-survey and approval. Supplier will notify the Purchaser of any product or process changes or changes in approval status that affect the Purchaser’s product and are subject to re-survey and approval.

**– flow down to external providers applicable requirements including customer requirements;**

Suppliers shall flow-down to Sub-Tier Suppliers the applicable requirements as required by the purchase order either specifically or by reference.

**– provide test specimens for design approval, inspection/verification, investigation, or auditing;**

When requested by the Purchaser or its customers, Supplier will provide test specimens for inspection/verification, investigation and/or auditing purposes.

**– retain documented information, including retention periods and disposition requirements;**

Unless otherwise specified on the Purchase Order, the latest specification revision in effect at the time the lot of raw material/parts was originally manufactured or processed shall apply. In the event a document has been superseded, the latest revision of the superseding document shall apply. All certifications, test reports, and inspection reports, as well as receiving inspection, in-process inspection, final inspection, and calibration records shall be retained for a minimum of ten years, unless otherwise specified by the Purchaser. These records will be made available to the Purchaser’s customers, or regulatory agency upon request.

**– prevent Foreign Object Debris**

Supplier is required to establish and maintain a Foreign Object Debris (FOD) prevention program that employs appropriate housekeeping practices to assure timely detection and removal of residue/debris generated, during operations and normal daily tasks.

**L. The right of access by the Purchaser, the Purchaser’s customer, and regulatory authorities to the applicable areas of facilities and to applicable documented information, at any level of the supply chain;**

The Purchaser and the Purchaser’s customer reserve the right to perform an on-site inspection of the Supplier’s facility or visit the facility. The Purchaser will give reasonable notification to the Supplier prior to the on-site inspection. The on-site inspection may include surveillance of the Supplier’s facilities, procedures, production methods, processes, and the Supplier’s Quality System. The Supplier shall furnish, at no cost, the necessary data as required by applicable drawings, Purchase Order, specifications, and inspection instructions to facilitate the on-site inspection

**M. Ensuring that persons are aware of: their contribution to product or service conformity; their contribution to product safety; the importance of ethical behavior.**

Supplier must be committed to the highest standards of ethics and business conduct. Supplier must comply with the law, honor commitments, act in good faith, and be accountable. Supplier must strive to maintain full compliance with all laws and regulations applicable to the operation of the business and customer relationships. Supplier must not offer, promise, authorize, or provide, directly or indirectly, anything of value (including business gifts or courtesies) with the intent or effect of inducing anyone to engage in unfair business practices. Supplier will avoid involvement in activities that may be perceived as a conflict-of-interest. Supplier will respect the legitimate proprietary rights and intellectual property rights of customers and Suppliers and take proper care to protect sensitive information, including confidential, proprietary, and personal information. Supplier will support product

safety by ensuring robust management of special requirements, critical items and key characteristics. If there are concerns with respect to product safety, Supplier will communicate them to the Purchaser if there is a concern at the Supplier's premises with respect to safety during the manufacture of the product, Supplier will notify its own employees of the concern and whenever possible, mitigate the concern. Supplier will ensure that employees and people working on its behalf are aware of: Their contribution to product or service conformity, their contribution to product safety and the importance of ethical behavior.

**Notices:**

1. Supplier must furnish Purchaser with a valid resale or tax exemption certificate. If not, Supplier will be responsible for remitting all applicable federal, state, or local taxes to Purchaser. Purchaser upon request will furnish Supplier a resale tax exemption certificate.
  
2. This contractor and all subcontractors shall abide by the requirements of 41 CFR 60-1.4(a), 60-300.5(a) and 60-741.5(a). These regulations prohibit discrimination against qualified individuals based on their status as protected veterans or individuals with disabilities and prohibit discrimination against all individuals based on their race, color, religion, sex, sexual orientation, gender identity, national origin, or for inquiring about, discussing, or disclosing information about compensation. Moreover, these regulations require that covered prime contractors and subcontractors take affirmative action to employ and advance in employment individuals without regard to race, color, religion, sex, sexual orientation, gender identity, national origin, disability, or veteran status.
  
3. Supplies furnished under any contract or subcontract shall contain no metallic mercury or mercury compounds and shall be free from mercury contamination. Mercury contamination of the supplies will be cause for rejection of the material or product.
  
4. Controlled Unclassified Information (CUI – NIST 800-171 current Rev) is information that requires safeguarding or dissemination controls pursuant to and consistent with law, regulations, and government-wide policies. **For Duncan Machine Products, Inc.'s purpose any purchase order marked CUI the Vendor must take all necessary precautions to protect the data and physical parts from Export inside or outside the Vendor's company.** Purchase Orders marked CUI refer to CUI (NIST 800-171), International Traffic in Arms Regulation (ITAR- 22 CFR 120-130), Export Administration Regulations (EAR – 15CFR 730-774), Federal Contract Information (FCI – FAR Part 17). and up most precautions must be taken to protect the data from Export. Vendor must not be on any excluded parties list including the Consolidated Screening List (CSL) which is a list of parties for which the United States Government maintains restrictions on certain exports, re-exports or transfers of items. It is a consolidated list from eleven export screening lists from Department of Commerce, Department of Treasury, and several US Government agencies.
